COMPANION ITEMS

Held items, trainer gear, and the Master Ball

Companion Held Items

Companions may hold one item at a time (two with the Ancient Binding item). A companion attunes to a Held Item after one full Long Rest. Attunement counts against the Fablekeeper's total attunement slots. Items are only active while the companion is on the field.

Rocky Helmet · *Uncommon*

When a creature hits this companion with a melee attack, that creature takes 1d8 piercing damage from jagged protrusions — no action, no save.

Leftovers · *Uncommon*

At the start of each of your turns, this companion regains 1d6 HP passively. Stacks with Snorlax's Rest. Never turns off.

Focus Sash · *Rare*

Once per Long Rest: when this companion would be reduced to 0 HP by a single hit, it drops to 1 HP instead. The companion does not faint and this does not generate Dramatic Ink. If the Sash has already been triggered, it provides no benefit until the next Long Rest.

Eviolite · *Rare*

Unevolved companions only (Stage 1 or Stage 2 of a three-stage line). This companion gains +3 AC and +20 maximum HP. When the companion reaches their evolution level threshold, the Eviolite falls off and must be attached to a different unevolved companion. Creates a genuine tradeoff: a permanently boosted Haunter or Kadabra may outperform their Stage 3 evolution in certain roles.

Choice Band · *Rare*

Designate one of this companion's Basic Actions as its Choice Action when equipping. That action deals +2d8 of its primary damage type. While on the field, the companion may only use its Choice Action — all other Basic Actions are unavailable until it is switched out and back in. Switching resets the choice.

Life Orb · *Very Rare*

This companion's attacks deal +2d6 of their primary damage type. After any turn in which this companion dealt damage (through an action or Signature Move), it takes 5 HP damage. This damage cannot be prevented or reduced by any effect.

Expert Belt · *Rare*

When this companion scores a critical hit, apply one automatic condition corresponding to the damage type — no saving throw. Fire: Frightened; Cold: speed halved; Lightning: loses Reaction; Necrotic: Disadv. next attack roll; Psychic: Disadv. next save; Slashing: Disadv. next Str check; Bludgeoning: Prone (Large or smaller only); Poison: Poisoned; Radiant: can't benefit from invisibility; Force: pushed 15 ft. All conditions last until end of the target's next turn.

Assault Vest · *Rare*

This companion has Advantage on all saving throws against spells and magical effects. While wearing this item, the companion cannot use any non-damaging Basic Actions — healing, buffing, or utility actions are suppressed. Particularly powerful on support companions being run offensively (Blissey with Assault Vest uses Egg Bomb exclusively while the Item Master handles healing through the Bag).

Fablekeeper Items

Scholar's Monocle · *Uncommon*

This obsidian lens, worn over one eye, enhances your Trained Eye ability. Trained Eye is now a free action (no Bonus Action cost) and reveals all three defensive properties simultaneously — immunities, resistances, and vulnerabilities — in one use.

Ink Crystal · *Uncommon*

A shard of crystallized narrative energy. As a Bonus Action, crush the crystal to immediately regain 3 Ink. Consumable — one use only. Can be purchased from specialized vendors, found as treasure, or crafted with an Herbalist's Kit and 8 hours of work.

Everfull Satchel · *Uncommon*

This bottomless bag replaces the Witch's Bag. Your daily Witch's Bag uses increase by 4. The satchel always smells faintly of something warm and familiar regardless of its contents.

Commander's Flag · *Rare*

A small signal flag worn at the hip, once used by legendary Trainers to coordinate their teams from a distance. Inspire the Chapter may target two creatures simultaneously. Both receive the full bonus.

Ancient Binding · *Very Rare*

A decorative clasp for your Tome. Once attached, it is permanent. Choose one Signature Move in your Tome at dawn each day — that Signature refreshes after a Short Rest (giving two uses per SR total). Additionally, one companion of your choice may hold two Held Items simultaneously instead of one.

Evolution Stone Pendant · *Rare*

A compressed evolution stone in pendant form. Once only: one companion in your Tome immediately evolves to their next stage, bypassing the level threshold entirely. The pendant crumbles after use. Consumable.

This is a narrative item as much as a mechanical one — giving a player their Stage 3 companion two levels early is a memorable moment. Typically awarded rather than purchased.

The Master Ball

Master Ball · *Legendary* · *Requires Attunement*

A perfect sphere of deepest indigo with a stylized M pressed in gold. It hums with contained power. Looking into its surface, a Fablekeeper sees the barest shimmer of something vast inside.

When first opened, the Fablekeeper spends a full night in meditation with their Tome. At dawn, one Legendary companion's story is inscribed in a new section deeper than all existing pages — written in different ink, impossible to remove. Choose one: Rayquaza, Mewtwo, Lugia, or Groudon.

The legendary companion does not count toward the four-companion roster limit. See the [Legendary Companions](#) section of this Pokédex for full stat blocks.
